What we will cover

Why Governance (shift left) ?

- Manual reviews, drift, inconsistency
- Policy-as-Code is enabler
- Better Outcomes

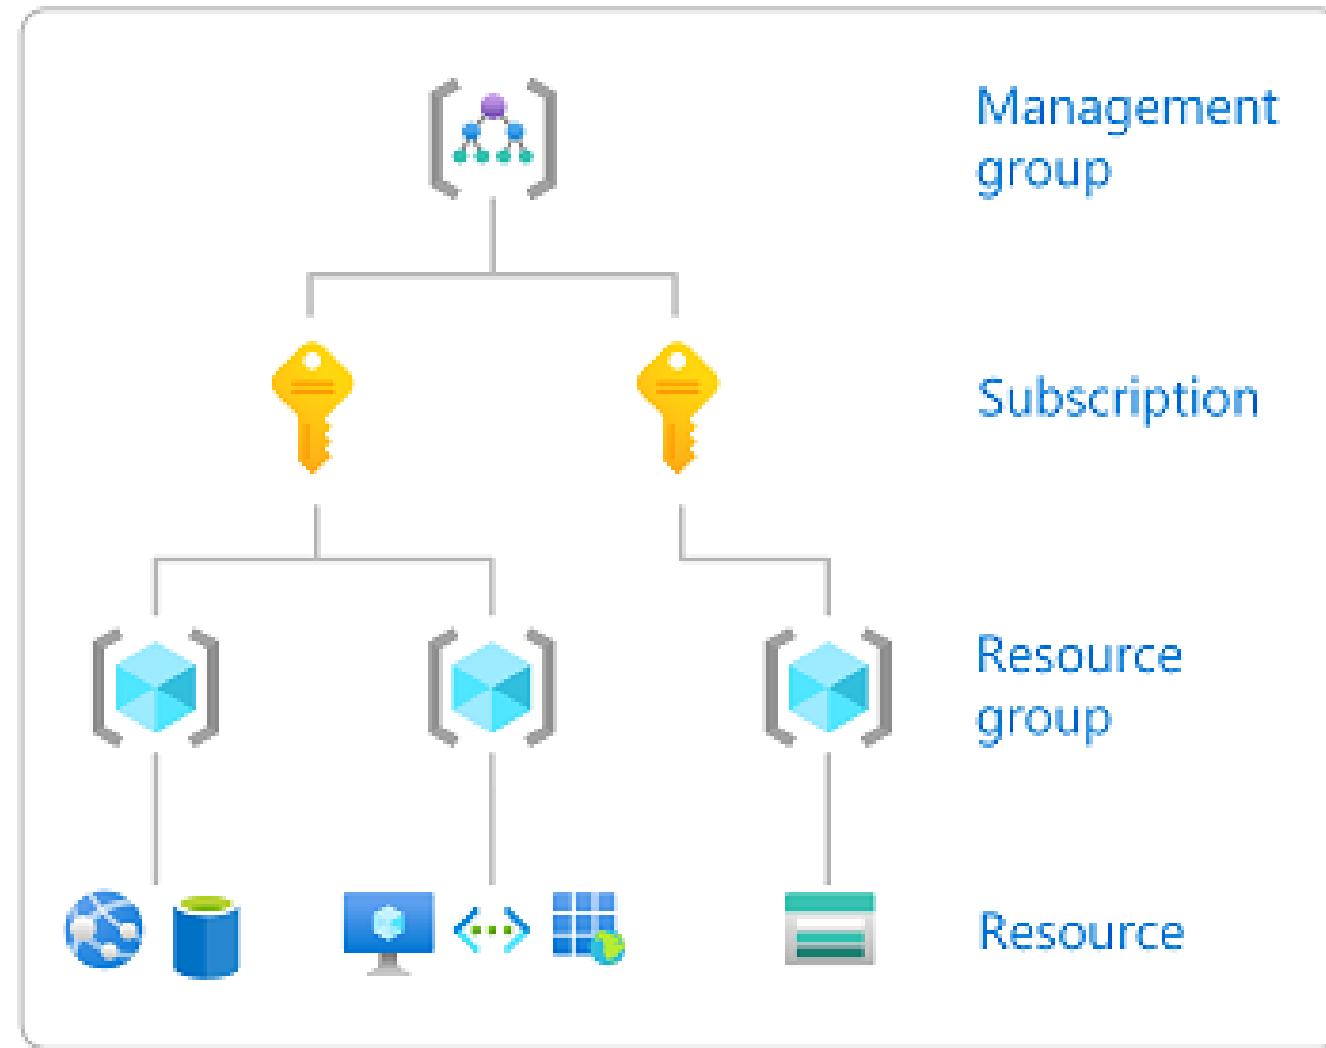

Governance Building Blocks

- What are the Azure Scopes?
- Azure Policy effects
- What are the Initiatives?

Azure Scope Levels

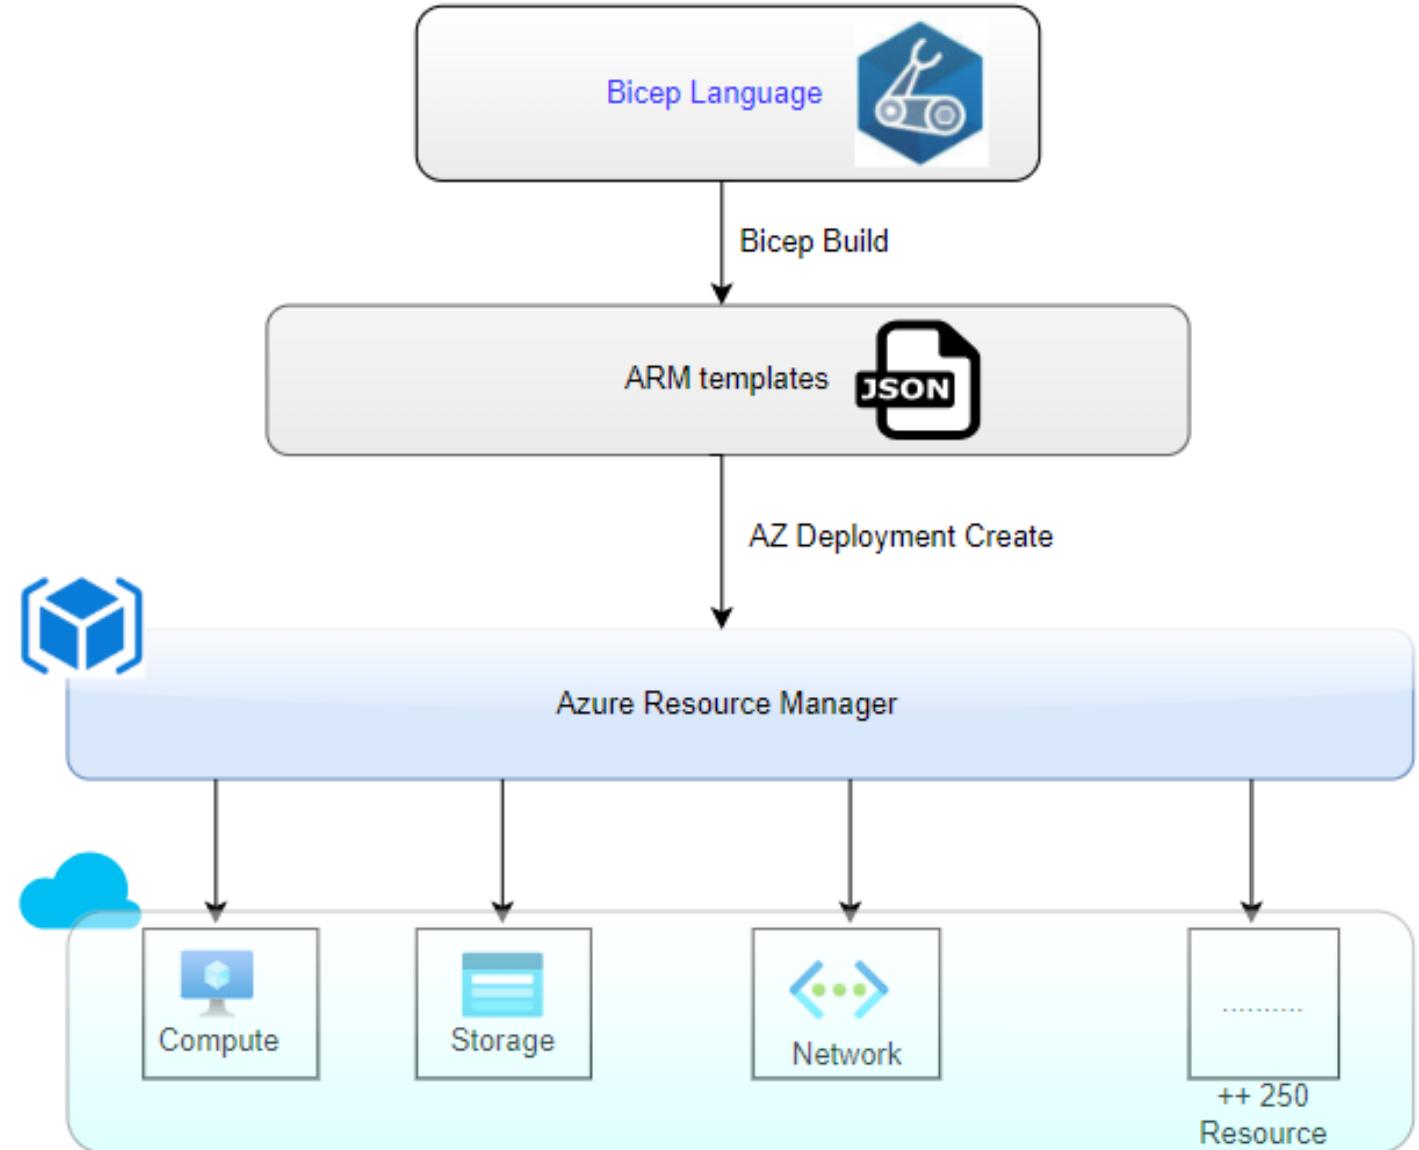

What Azure Bicep for Policy-as-Code?

- Domain Specific Language (DSL)
- Azure-native, readable syntax & modules
- Type safety, tooling, and what-if planning
- Reusable guardrails for platform teams

Bicep connection to ARM

Azure Bicep video courses on LinkedIn

Awesome Azure Bicep community repo?

AWESOME Azure Bicep 💪 ↗

 awesome  Markdown Link Checker passing

A curated list of AWESOME blogs, videos, tips-and-tricks, codes, tools, and scripts. Hand-picked tips and tricks to help you learn Azure Bicep and get you ready to start deploying Azure resources to your favorite environment(s).

Community contributions are very welcome! Check out the [contribution guide](#) and submit a Pull Request with your adds/removes/changes to the content!

Bicep with Azure Policy

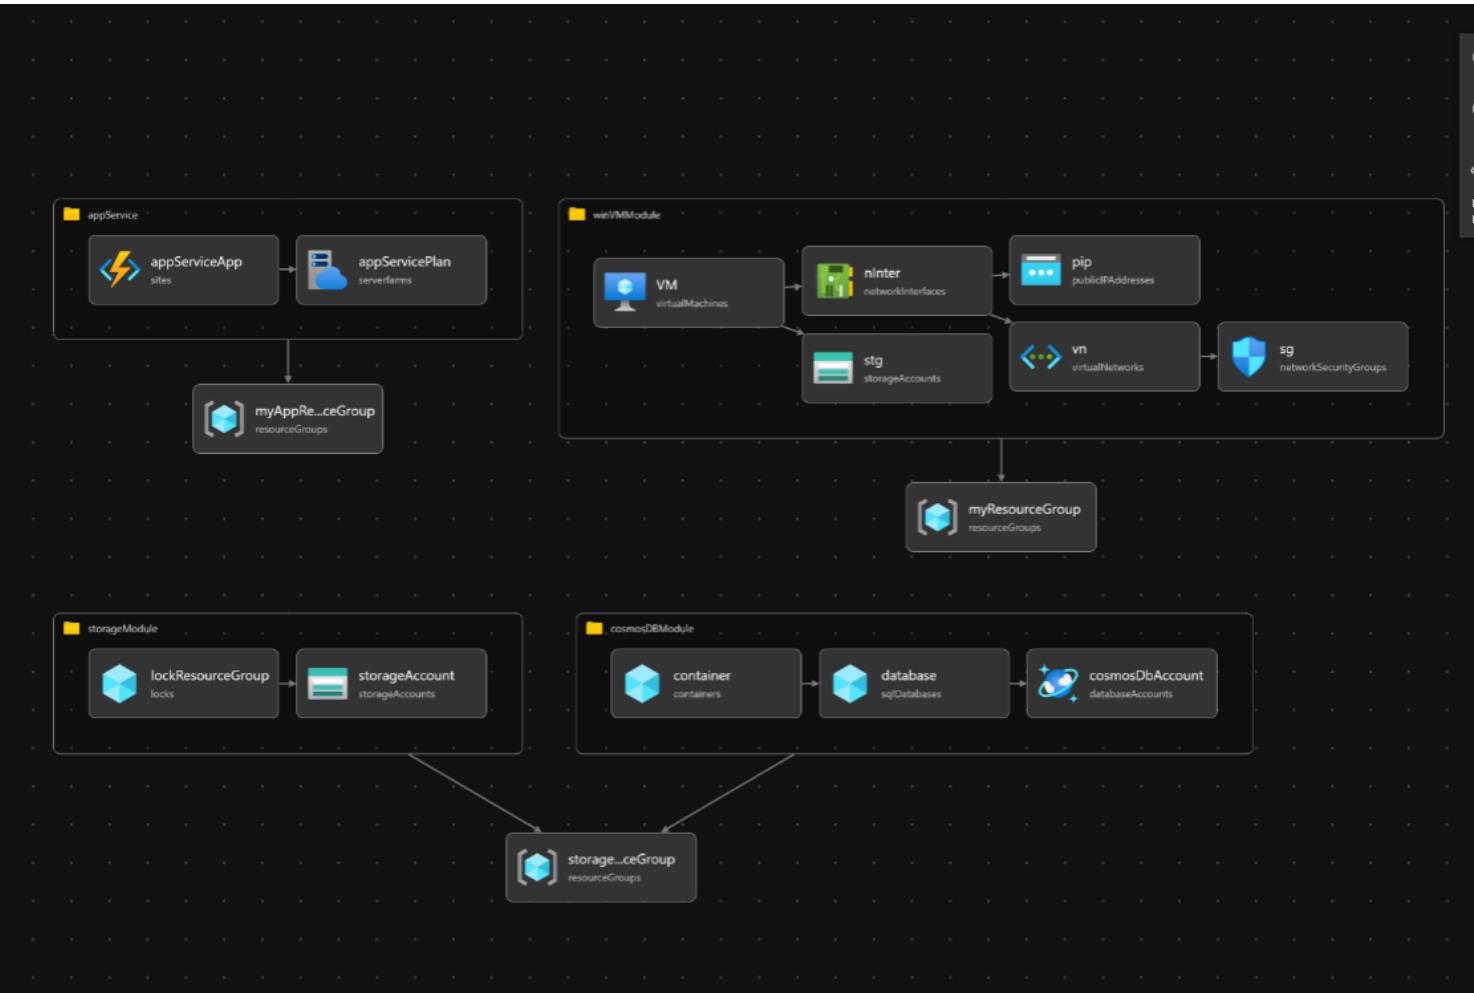

Bicep Best Practices

- Set targetScope
- Parameterize
- Use modules
- Run what-if and enable linter
- Bicep Visualizer

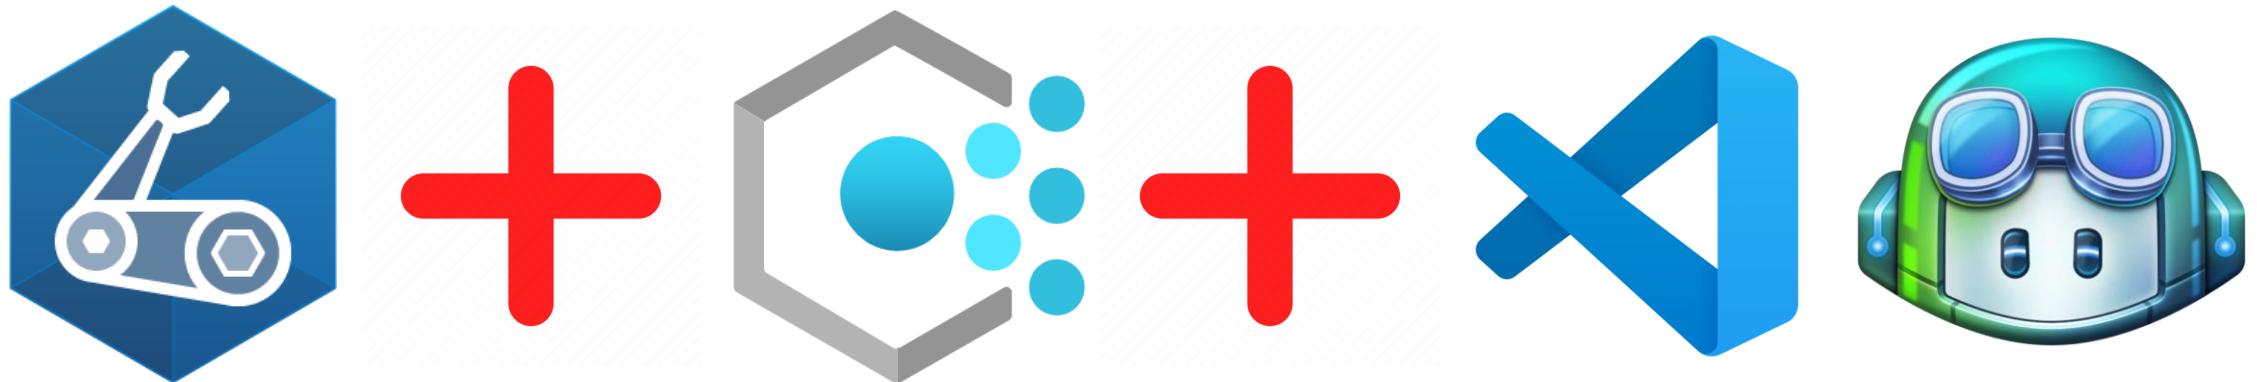

Visualizer v2

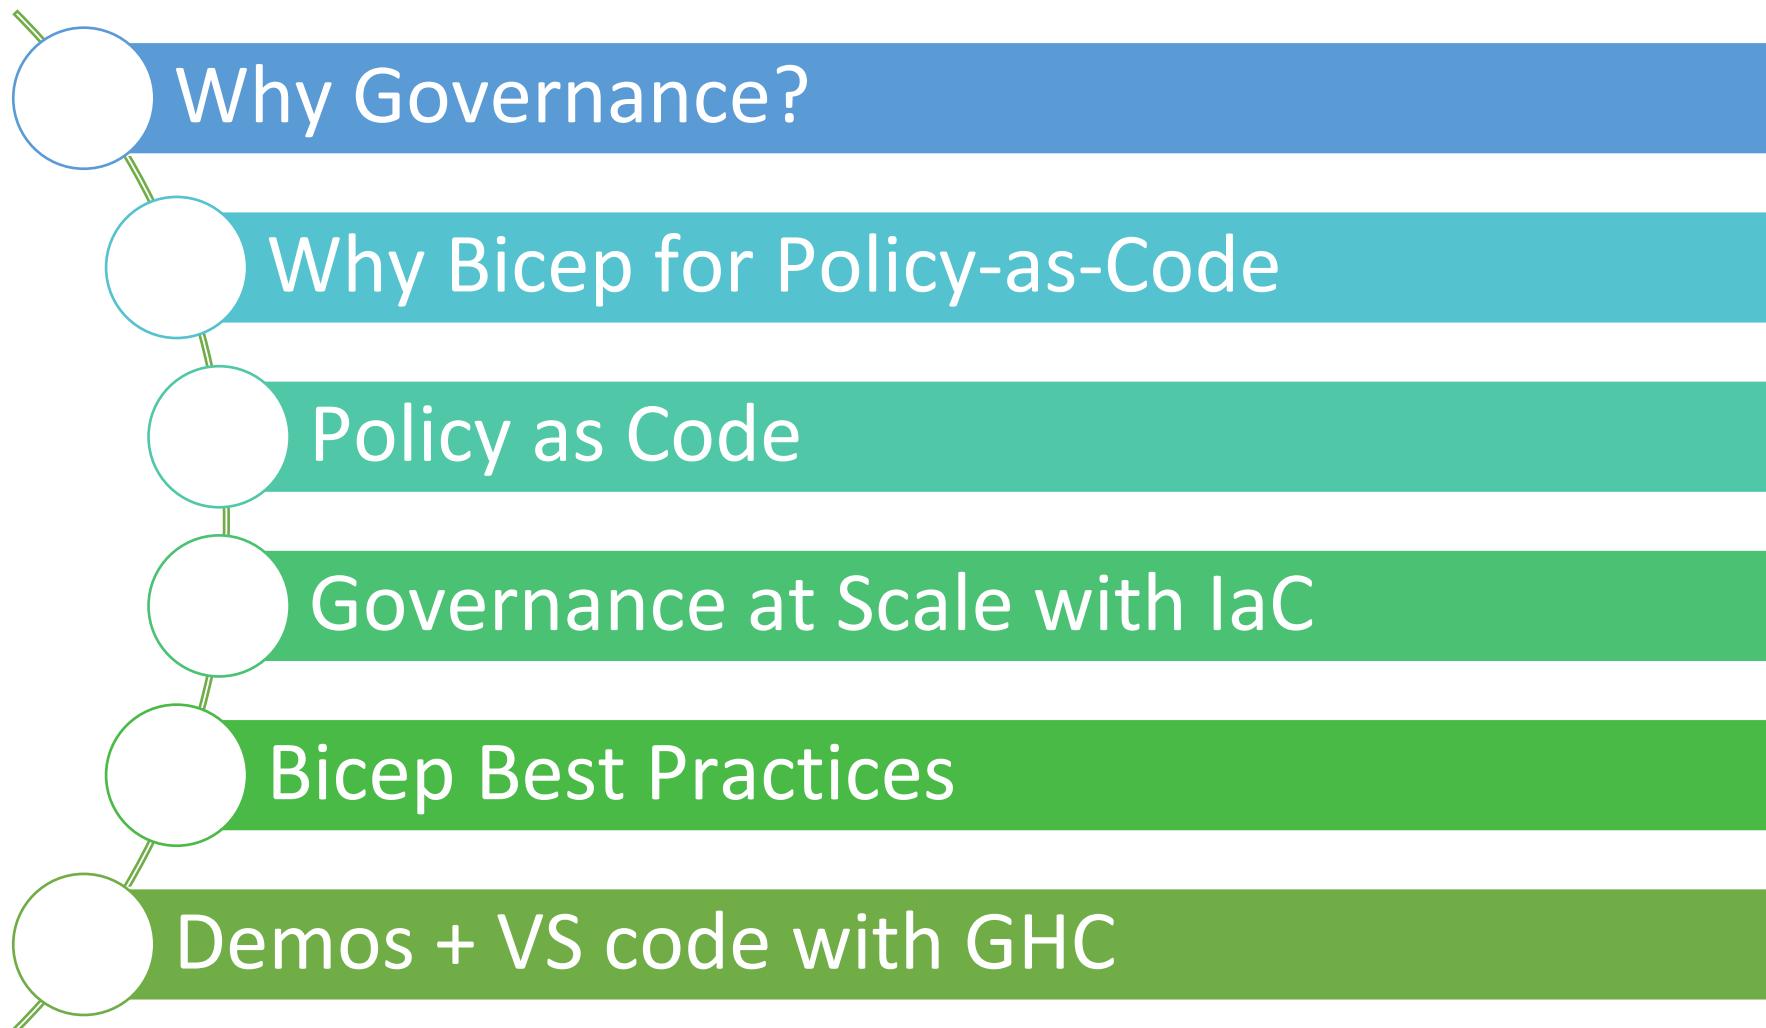

```
samples > 7-deploy-modules-w-param.bicep > azureRegion
You, 6 months ago | 1 author (You)

VS Code Experimental & Deployment Pane

The screenshot shows the VS Code settings interface. On the left, there's a sidebar with various Azure services like Resource Manager, Static Web Apps, Storage Accounts, and Virtual Machines. Under the 'Bicep' section, several options are listed: C#, Code Spell Checker, CodeTour, Copilot, CSS Language Features, Dev Containers, Docker, EditorConfig, Emmet, Git, Git History, GitHub, GitHub Actions, GitHub Enterprise Server, GitLens, Grunt, and Gulp. A search bar at the top says 'Search settings'. A blue button 'Turn on Settings Sync' is visible. In the main area, there are sections for 'Bicep: Enable Surveys' (with a checked checkbox) and 'Bicep: Experimental: Deploy Pane' (also with a checked checkbox). Below these, there's a section for 'Bicep: Suppressed Warnings' which lists warnings that have been suppressed. At the bottom, there's a 'Messages' dropdown menu.

This screenshot shows the 'Deploy 1-deploy-rg.bicep' pane. It has tabs for 'Deployment Scope' (with 'Subscription Id' set to 'e1dbf1c1-1854-475e-a1f6-bfb5d2a66337' and 'Location' set to 'eastus2'), 'Parameters' (with 'resourceGroupName' set to 'rg-BackToFuture', 'azureRegion' set to 'eastus2', and 'deleteUnusedParam' set to 'no'), and 'Actions' (with buttons for 'Deploy', 'Validate', and 'What-if'). The 'Result' section at the bottom shows 'Succeeded'.
